

IJ106 - Recycled Natural White Matte Paper 95gsm

Product	Description	Recycled Natural White Matte Paper 95gsm is a lightweight, environmentally responsible inkjet paper manufactured from 100% recycled fibres. Its natural white shade offers a softer, warmer appearance than conventional bright-white papers, making it particularly suitable for brands, designers and organisations wanting their printed graphics to reflect a more natural and sustainable identity. Designed for use with water-based inkjet printers, the smooth matte surface produces crisp text, fine detail and attractive colour graphics with a low-glare finish. At 95gsm, it is an economical and versatile choice for everyday large-format printing, promotional graphics and creative applications.
