

Epson dye sublimation technology allows you to produce colourful textiles quickly and at high quality.

The SC-F9400 64-inch dye sublimation printer has been developed primarily for fast, high-volume printing, for clothing, textiles and soft signage, as well as other printed merchandise.

Stay productive

The SC-F9400 has a maximum speed of 108.6m²/h for fast turnarounds. The updated settings deliver a lower tension and accurate registration, which improves take-up and reduces the total cost of ownership (TCO) by using lower-weight sublimation papers.

The complete solution

Epson makes the printer, the printhead, the inks, sublimation papers and software, and supplies the warranty and service. This comprehensive solution offers the user consistency of quality and peace of mind.

Wide colour gamut

The SC-F9400 uses dedicated Epson UltraChrome DS inks for accurate reproductions of complex and colourful designs.

Ready to wear

The SureColor SC-F9400 comes with Oeko-Tex Eco Passport certification, meaning that clothing and textiles produced on the printer using UltraChrome DS inks are completely safe to wear for adults and children, including babies.
